Re: Applicability of Canton Permitting Requirements

Dear Andy:

This letter is to confirm that construction by Patriot Renewables, LLC of its Canton and Saddleback wind power projects, which will consist of wind turbines, electrical transmission lines and an electrical substation, does not require any permitting approvals from the Town of Canton. Specifically, the projects do not require a building permit from the Town of Canton or a permit under the Canton Commercial Use Ordinance.

Sincerely,

Kathleen Hutchins
Town of Canton Planning Board
